DETAILED ACTION

Claim Objections

1. Claims 3-17 are objected to because of the following informalities: Claims 3-17 depend from cancelled claim 1. This can be corrected by changing "1" to ---2--- as appropriate.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 2-13 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for radiation sensitive material, does not reasonably provide enablement for a layer of material not radiation sensitive. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. The specification provides details of radiation sensitive materials, but does not list the materials, which constitute an example of a layer of material, which is not radiation sensitive.

Since claim 2 incorporates the limitations of canceled claim 1, this action under 112 includes claims 3-13 which were depended from claim 1 and would have been amended by the examiner if this application was in conditions for allowance.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 09/898,580

Art Unit: 2873

13

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: While claims 2 recites a composite image and images that appear under reflected light to float above, below or in the plane of the sheeting, claim 2 does not provided sufficient structure and structural relationship to bring about the functional limitation.

Claim 7 recites the limitation "the radiation sensitive material" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Examiner's Comment

- Due to the indefiniteness of the claimed invention, as directed to the rejection under 35
 U.S.C. 112, first paragraph, allowability of claims could not be adequately ascertained.
- 7. The continuing data on page 1, line 7, should be updated to reflect the US Patent number for application 09/510428.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricky L Mack whose telephone number is (703) 305-6984. The examiner can normally be reached on Monday-Friday (6:30 AM to 4:00 PM).
